

Port of NEW LONDON

Your Path to America's Manufacturing Hub

Operated by Logistec, Connecticut's eastern port is located near major shipyards such as Electric Boat and the U.S. Navy Sub Base in Groton, as well as United Technologies, Pratt & Whitney, and General Electric. This makes New London the ideal path to America's biggest manufacturers.

Featuring easy access to I-95, I-395, the New England Central Railroad, and Atlantic shipping routes, the Port of New London makes it simple and convenient to get your goods where they need to go.
